## PROJECTS

### Amazon Sales Analysis Dashboard | Data Analytics July'25

- Created a dynamic dashboard to analyze YTD sales, product reviews, and category-wise trends.
- Used DAX for calculating key metrics like YTD/QTd sales and product count.
- Improved skills in data visualization, business insights, and report storytelling.

### Life Expectancy Prediction: | R, ggplot2, dplyr, Kaggle Dataset Jan '25

- Analyzed the WHO Life Expectancy dataset containing 2,938 records and 22 variables, covering global health, economic, and social indicators.
- Performed data cleaning, exploratory data analysis (EDA), and regression modeling using R (dplyr, ggplot2, caret).
- Discovered strong correlations between life expectancy and factors like *adult mortality*, *schooling*, *GDP*, and alcohol consumption.
- Key insights: Higher education levels and income improve life expectancy, while higher adult mortality and alcohol usage reduce it.
